# JSON

Gaining **popularity** in Web App development

- Smaller than XML files
- More intuitive for developers

One disadvantage (until recently): no **schema!**

# JSON

Gaining popularity in Web App development

- Smaller than XML files
- More intuitive for developers

Disadvantage (now): schema is yet under development

# JSON SCHEMA

# JSON SCHEMA

```
{  
  type : object,  
  properties : {  
    maker : {type : string},  
    style : {type : string },  
    year : {type: int},  
    price : {type : int}  
  }  
}
```

# JSON SCHEMA

```
{  
  type : object,  
  properties : {  
    maker : {type : string},  
    style : {type : string },  
    year : {type: int},  
    price : {type : int}  
  }  
}
```

# JSON SCHEMA

```
{  
  type : object,  
  properties : {  
    maker : {type : string},  
    style : {type : string },  
    year : {type: int},  
    price : {type : int}  
  }  
}
```

# JSON SCHEMA

```
{  
  type : object,  
  properties : {  
    maker : {type : string},  
    style : {type : string },  
    year : {type: int},  
    price : {type : int}  
  }  
}
```

```
{  
  "general": {  
    "name": "Amazing Guitars",  
    "url": "amazingguitars.com"  
  },  
  "catalog": [  
    {"maker": "Guitar maker",  
     "style": "Acoustic",  
     "year": 2010,  
     "price": 1000},  
    { ... }  
  ]  
}
```

# JSON SCHEMA

```
{  
  type : object,  
  properties : {  
    maker : {type : string},  
    style : {type : string },  
    year : {type: int},  
    price : {type : int}  
  }  
}
```

```
{  
  "general": {  
    "name": "Amazing Guitars",  
    "url": "amazingguitars.com"  
  },  
  "catalog": [  
    {"maker": "Guitar maker",  
     "style": "Acoustic",  
     "year": 2010,  
     "price": 1000},  
    { ... }  
  ]  
}
```

# JSON SCHEMA

- Initial draft by 2010
- Currently Draft 4 (2013)

# JSON SCHEMA

- Initial draft by 2010
- Currently Draft 4 (2013)
- Droettboom provides good interpretation (2015)

# Understanding JSON Schema

Juan L. Reutter

Center for **Semantic Web** Research

# SATISFIABILITY

Does this schema admit any valid document?

# SATISFIABILITY

Does this schema admit any valid document?

# INSTANCE VALIDATION

Does this document conform to a schema?

# Interesting features of JSON SCHEMA

- Possibly recursive definitions

```
{
  definitions: {
    address: {
      type: object,
      properties: {
        street_address: { type: string },
        city:           { type: string },
        state:          { type: string }
      }
    }
  }
}
```

- Possibly recursive definitions

- Possibly recursive definitions

```
{
  definitions: {
    address: {
      type: object,
      properties: {
        street_address: { type: string },
        city:           { type: string },
        state:          { type: string }
      }
    }
  }
  type: object,
  properties: {
    billing_address: { $ref: #/definitions/address },
    shipping_address: { $ref: #/definitions/address }
  }
}
```

- Boolean combinations of schemas

- Boolean combinations of schemas

```
{  
  anyOf: [  
    { type: string },  
    { type: number }  
  ]  
}
```

```
{  
  allOf: [  
    { type: string },  
    { type: number }  
  ]  
}
```

```
{ not: { type: string } }
```

- Unique constraints

“All my children are different JSON documents”

- Numeric constraints

“I have between  $k$  and  $l$  children”

# Complexity of satisfiability

- How to manage all these features
- Smaller fragments via alternating automata

# Validation

- In PTIME

# Validation

- In PTIME
- Could not find any tool that was working properly

# Future Work

Several other important problems to solve

# Future Work
